

How easy? We'll show you how...

First: Log In

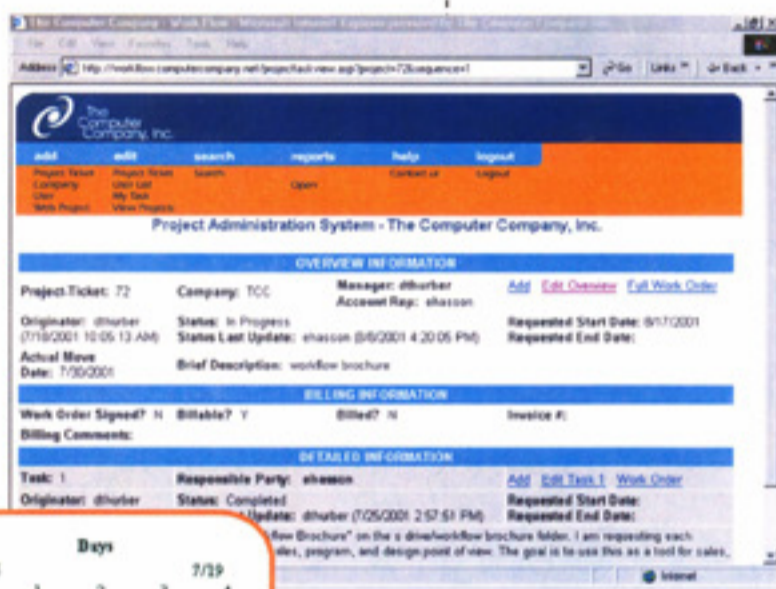

>Your system will include password protection access with various security levels. This allows you to decide who will have access and what they can see.

Second: View Project Time Line

>An overview of your project, the assigned tasks, and the current status.

Third: Update your Projects in real time!

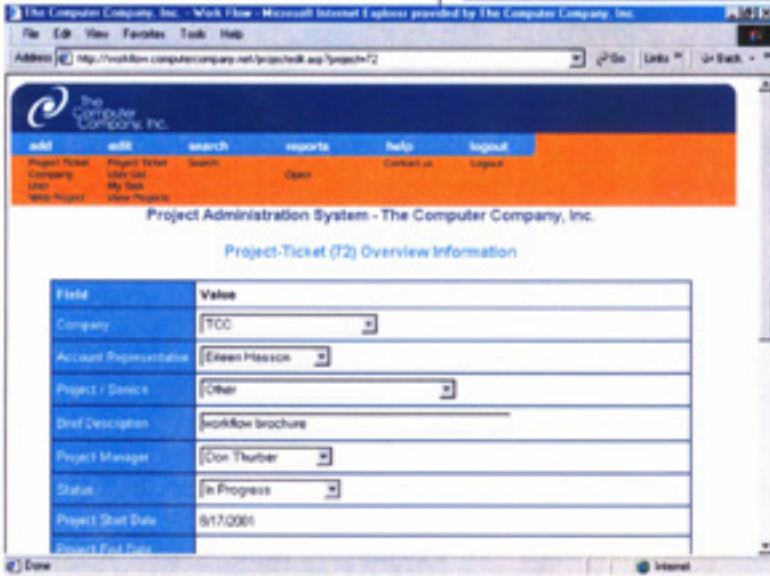

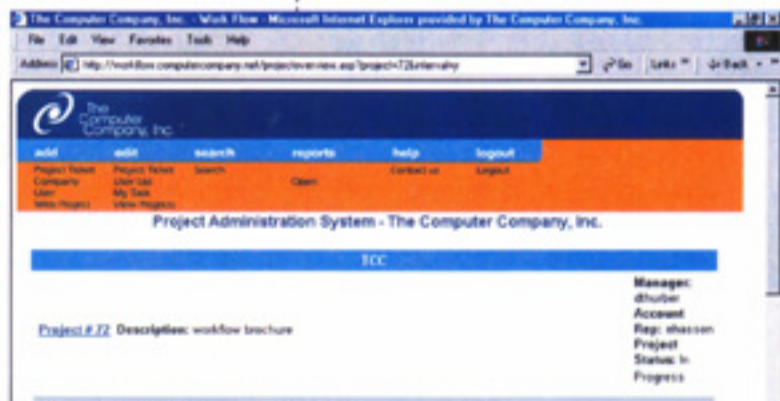

>Always have the most current information in your system. Add, Change or Edit your projects from anywhere, in real time. Use your reporting feature to compile a listing of projects or check on billing status.

Need more detail?

Enter the Project Administration System

>Get full project details, including each task, to whom it has been assigned, the current status, company notes, and any other information you would like to include. It can be customized to interface with your current billing system to allow direct invoicing of completed projects.

>Improve company communications through your new Automatic E-Mail System.

Automatic E-Mail System

Email Additional People to select multiple hold down the control key

>Just select one or more system users to receive updated email notification of their project status. Your updated project task will be sent to the selected users with just a click of the mouse.
