

What is it?

A web-based **project management tool** designed to save time, save money and get the job done right the first time.

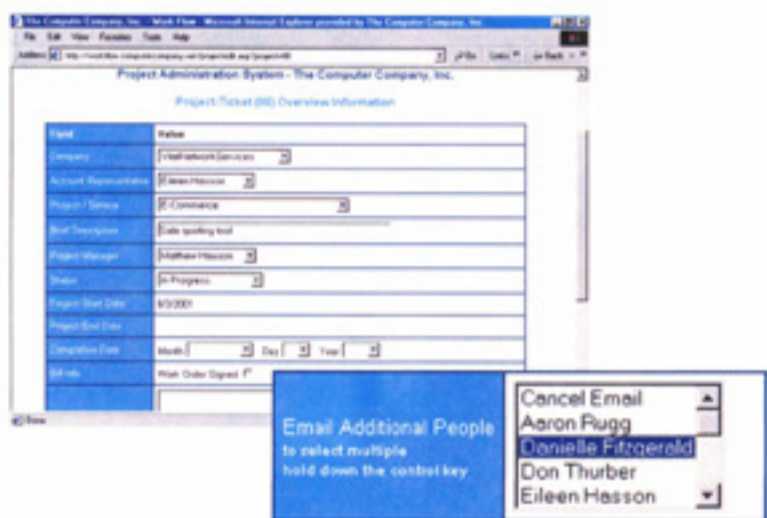

What can it do?

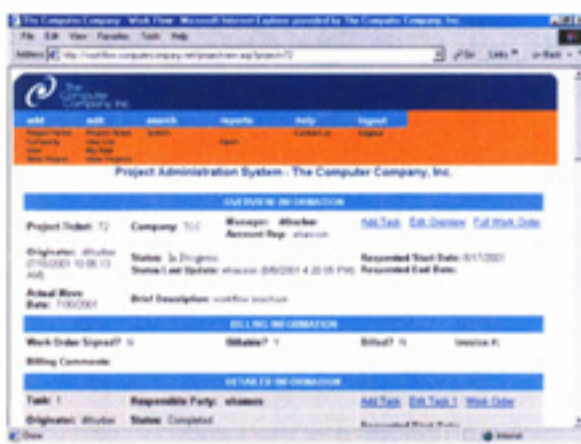

Maintain up to date project time lines from start to finish. Always know where your project stands. View tasks already assigned, those in progress, and the time line for completion. Forecast ahead for **Improved business strategy**.

Assign tasks and notify users via email. Maintain and **improve communication within your company**. Our built in email system allows you to notify users of the latest project status with a click of the mouse.

Allow access 24 hours a day...you can check your project status from anywhere...all you need is an internet connection. **Assign tasks and check your status** on the road, at home, or even off hours.

Who can use it?

Anyone with an internet connection - PC or Mac. Password protection access to your system is assigned by you through our **easy to use administration system**. Various security levels are available and determined by your specific needs.

How do I start?

> **One phone call** to The Computer Company, Inc gets you on the road to a more efficient, easy to use project management tool.

Do I need software or a special operating system?

> No, all you need is internet access. Call The Computer Company, Inc at (860) 236-1600 to **arrange a live demo** of The Workflow.

Can we customize it?

> Yes! The Workflow is easy to customize. Our custom programming skills allow us to **modify the system to your specific needs**. Meet with one of our designers to determine your Workflow's goals.
